

### Abstract of the Disclosure

5 A disposable diaper comprising a fluid-permeable topsheet, a fluid-impermeable  
backsheet and a fluid-retentive absorbent core interposed between the topsheet and the  
backsheet, the disposable diaper being formed in a substantially vertically elongated  
configuration and having a stomach side, a back side and a crotch region positioned  
10 between the stomach side and the back side, wherein a second absorbent core is  
disposed at an outside region of each opposite side edge of the absorbent core at the  
crotch region along a longitudinal direction of the diaper, and an elastic member is  
disposed at the region where the second absorbent core is disposed along a longitudinal  
15 direction of the diaper
